

7.0 Work Instruction Steps

7.1 Get vacuum from closet and place it on bench with bottom exposed.

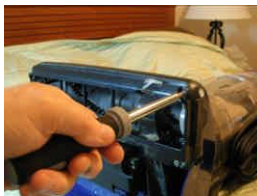

7.2 Get screwdriver

7.3 Assemble tip into screwdriver

7.4 Loosen screw with screwdriver and Phillips tip, four (4) places

7.5 Remove roller guard

7.6 Apply pressure with thumb and dislodge second guard

7.7 Separate from hinge and place on bench

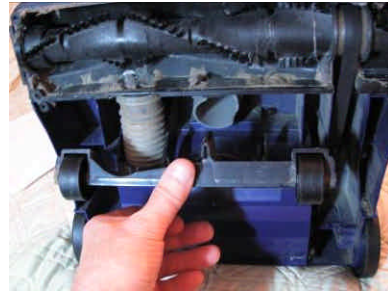

7.8 Visually inspect for excess obstructive debris around roller. Remove if necessary with fingers.

7.9 If all is clear, position bottom of cover in hinge and assemble second cover to bottom of vacuum.

Operator Note: Apply force with thumb so tab on cover is can fit into bottom of vacuum and cover will close.

7.10 Position roller guard over four (4) holes so that belt guard is properly positioned. Insert four (4) screws into four (4) holes and hand start.

7.11 Tighten four (4) screws with phillips screwdriver, and reposition vacuum and place on floor.
